

AIRMAX

Advanced Air Flow Technology

The AirMax is a non-powered, self-adjusting replacement mattress that automatically redistributes pressure by actively moving with the patient.

KEY FEATURES:

- Safe Working Load - **up to 250kg**
- Risk Category - **High**
- Waterlow Scale - **10+**
- Pressure Sore Grading - **2**
- **Foam-air technology**, that moves with the patient
- **Low interface pressures** for improved blood circulation and wound healing
- **No pump or power needed** – dramatically reducing the lifetime cost of ownership
- Specialised design features a **sloped heel section**, to ease pressure and protect this vulnerable area.
- Handles for **ease of carrying**
- Buckle and straps for **safely securing** it to the bed frame
- Durable, vapour permeable and water resistant 2-way stretch coverlet to **protect the skin from shearing**
- Hidden zip for improved **infection control**
- Flexible contour design for **profiling beds**.
- When an active patient needs a more **comfortable pressure ulcer solution**
